Zebras

Zebras are single-hoofed and are related to horses and donkeys. They can be found in the grasslands, woodlands, deserts, and mountains of Africa. Zebras are social animals and live in groups called herds. When they migrate to find new grass to eat or water to drink, they move in "super herds" with thousands of other zebras. Sometimes other grazing animals, like antelope and wildebeest, also travel with the large group.

Zebras are easy to identify due to their bold stripes. Each of the three species of zebra have stripes that are different. Regardless of the pattern, the zebra stripes work as camouflage. Zebras in a group make it more difficult for a predator to zero-in on a single zebra prey. Zebra predators include lions, hyenas, cheetahs, and leopards. Although zebras look peaceful, they can be very aggressive when needed. Individual zebras can kick or bite. Groups of zebras also block predator attacks by working together to make a semi-circle.

CLIMBING MOUNT EVEREST

At 29,029 feet (8,848 meters) above sea level, Mount Everest is said to be the highest mountain on Earth. This mountain is located in the Himalayas between the border of China and Nepal. Each year, the mountain attracts many mountaineers. Some are very experienced climbers, while others use local guides to help them navigate the mountain.

Climbing Mt. Everest is a huge accomplishment and requires a high level of fitness and training. The mountain can be dangerous though, for even the best climbers. More than 5,000 people have attempted to climb Mt. Everest, and as of 2021, about 304 climbers have died trying.

Mt. Everest can be dangerous for a number of reasons including avalanches and extreme weather, which leads to frostbite. Falling into a crevasse, an icefall collapse, exhaustion, or illness are some of the other causes of fatalities. Regardless of the risks, about 500 people a year attempt to reach Everest's summit.

1. Mt. Everest is between which two countries?
A. China and Bhutan   B. India and Nepal   C. China and Nepal

2. Make an inference. Why do climbers need good fitness and training?
A. Climbing is challenging   B. Only beginners train   C. To lose weight

The TEACHER Next Door
ALSO INCLUDES A COPY OF PASSAGES IN GOOGLE SLIDES

YOU MAY USE THESE PASSAGES TO:

- Meet IEP and 504 requirements
- Highlight words or phrases for students
- Increase passage size and eliminate digital distraction for students
- Read the passage together (or to a small group) before assessing
- Add notes, task lists, or other helpful reminders to passages for students
- and more!

PASSAGES ONLY

Please note, the paired questions are only available on the printable and Google Forms versions of these resources (NOT on Slides).
